Dear President Stubb,

In the year 2001, my expectant wife K... and our three year old son W..., left our home in Australia — to visit relatives in Suomi or Finland.

My family never returned to Australia.

In 2002 our second son M... was born in Suomi.

In 2002 the *psychs claimed that K... was unwilling or unable to care for our boys.

And so she surrendered our children to them.

For the remainder of our boy's childhoods, Finnish state, corporate and charitable entities, harmed our children in the name of help; and they received millions of taxpayer euros — for farming and drugging our children.

The same thing is happening to thousands of children in Finland.

This is a violation of the Criminal Code of Finland, chapter 11, section 1. Genocide.

It is a law of nature that children belong with the closest possible of their family.

Since 2002, I have been asking the psychs, if any of them ever made any attempt to return my

children to me, or place them in the care of the closest of their many Finnish family members — the silence is deafening.

It has been said that some powerful Finnish people — within government, corporation and charity, have shares in some of Finland's children's homes — do you know any of their names?

If for example, Nokia — corporate telecommunications, or Mehiläinen — corporate medical, or Veikkaus — government gambling, were to donate to for example Pelastakaa Lapset or Save the Children.

Then, could a donor entity benefit, e.g. (a) tax deduction (b) a high paying position, for an ally, on the nonprofit board of Pelastakaa Lapset (c) overpriced contracts?

Can you think of any other ways in Finland — in the psych area, in which state/corporate/charitable entities could join forces to play merry hell with taxpayer's money?

It is my wish, in Finland, for all *involuntary "mental therapy" to be made illegal; and all taxpayer funding of psychiatry to come to an end.

I need your help.

Yours truly,

Warren Mclachlan

APPENDIX

*Psychs.

1. Psychiatrists, psychologists & social workers — as well as their masters, servants, and those who grow fat looking the other way.

Here we have those who appreciate the suffering of others above all else, the mercenary, the incriminated by association, and the useful idiot or true believer.

2. Harm in the name of help — mostly by the unwitting, to the involuntary at taxpayer's expense.

3. Philippe Pinel of Jonquières France, in Paris, in the year 1792, was the first psychiatrist employed by a European government.

Note: Queen Regent Maria Cristina of Bourbon abolished the Inquisition in 1834.

4. The witch hunter became the social worker, the witch pricker the psychologist, and the inquisitor the psychiatrist.

5. The "witch" burning inquisitor needed a wood merchant.

So too, for the slow burn of the "patient's" internal organs, the psychiatrist needs a drug manufacturer.

6. Clearly, normally, when an inquisitor "helped a witch", the physical/mental suffering caused

was "evidence" of demon possession, and proof that more extreme "spiritual assistance" was needed.

And with the psychiatrist, the physical/mental damage/suffering caused is evidence that stronger drugs are needed.

†Involuntary:

Without free and informed consent of an adult — or, if not possible, then their two closest relatives; or in the case of a child — their two closest relatives.

Jung, C.G.; 1875-1961; Psychiatrist.

"...Jung proposed a "Quaternity," with Satan as one of the four Persons of the Godhead."

"...psychiatry developed as the persecution of witches declined..."

— Szasz, Thomas; 1920-2012; Hungary; psychiatrist; author "The Manufacture of Madness".
